

“WSN” Demo Kit

G” version - 433,92 MHz

The “WSN” Demo Kit

- n.1 – SPS207G “microSP” Wireless Sensor
- n.1 – SKR3177G-D2 “microSP” USB Dongle

The ideal Demo-kit to start experimenting “WSN” with “microSP” Technology.

The SKR3177 USB Dongle is the point of access to the wireless network and, together with a PC, allows you to immediately start experimenting receiving data from the SPS207 wireless sensor.

Measurements of temperature and humidity can be immediately tested. The SPS207 magnetometer allows measurements of the Earth's magnetic field and also of external magnets can be tested.

SKR3177G-D2

A multi-function USB Dongle adapter that connects Desktop or Notebook Computers to “microSP” Technology wireless Sensor, Alarms, Tags

SPS207G-D2 - Three Sensors :

- Temperature (TMP112) -40 +85°C (10bit)
- Accelerometer (MMA8452Q) 3 Axis (12 bit)
- Magnetometer (MAG3110) 3 Axis (12 bit)
